

Pemafibrate ethyl ester of Formula VI and their use for the preparation of Pemafibrate of Formula-I.

SUMMARY OF INVENTION:

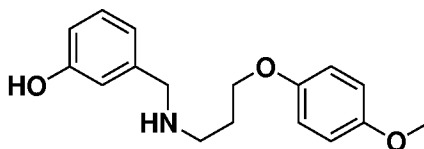

- 5 First aspect of the present invention is to provide a process for the preparation of Pemafibrate of Formula-I,

[Formula-I]

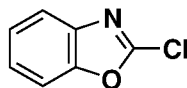

comprising the steps of:

- 10 a) reacting compound of Formula-II,

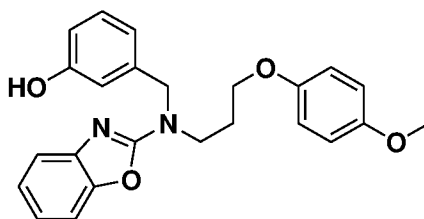

[Formula-II]

with compound of Formula-III,

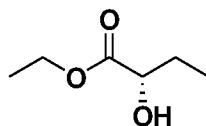

[Formula-III]

in presence of alkali metal carbonate and solvent to obtain compound of Formula-IV;

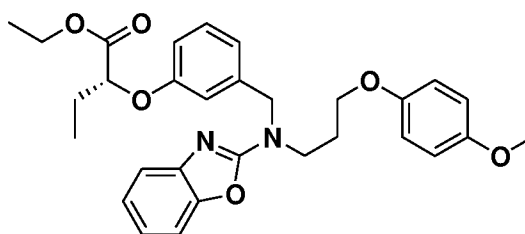

[Formula-IV]

- b) reacting compound of Formula-IV with compound of Formula-V,

[Formula-V]

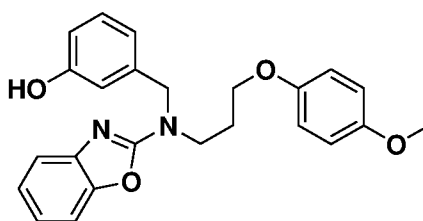

to obtain Pemafibrate ethyl ester of Formula-VI;

[Formula-VI]

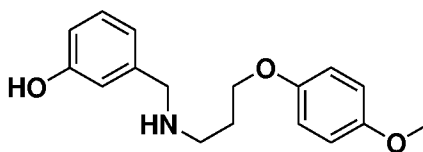

c) converting Pemafibrate ethyl ester of Formula-VI to Pemafibrate of Formula I.

- 5 Second aspect of the present invention is to provide a process for the preparation of compound of Formula-IV,

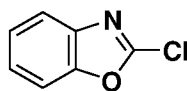

[Formula-IV]

comprising reacting compound of Formula-II,

[Formula-II]

with compound of Formula-III,

[Formula-III]

- 15 in presence of alkali metal carbonate and solvent to obtain compound of Formula-IV.

Third aspect of the present invention is to provide a process for the preparation of Pemafibrate ethyl ester of Formula-VI,
